

# Research Project I: Artificial Intelligence & Human-Computer Interaction

## Teams

### Folder: Setup

1. Create a folder for your team.
2. Label it: Teamname\_ProjectAI\_DT\_Sp2020
3. Within this folder create a folder called "References". Place all reference articles and links within this folder.
4. The completed assignment must be located in the folder. Content will then be placed on each student's e-portfolio.

## Project:

### Phase I

1. Students are placed into teams of 5.
2. Brainstorm Ideas for subjects the team wishes to investigate.
3. Choose subject to research
4. Begin research by finding articles online. Students are required to select no less than 7 articles. Additional resources include; wiki, video, websites. All references must be cited.

### Phase II

1. Create a project timeline
2. Complete research outline.
3. Complete reference list.
4. Develop a survey of questions and survey groups of people to support your research.

### Phase III

1. Organize and visualize survey in Tableau
2. Begin the rough draft

3. Review and edit rough draft.
4. Type final draft of essay.
5. Summarize research to present in slide presentation.

Title page

Index

Abstract and keywords

1. Intro: Background Information on topic.
2. Body I
3. Body II
4. Body III
5. Conclusion

The report is written as a team.

*Note: Each section can have 2 or more subsections*

The report is going to be 3000 words and requires citations for all references. Please include visual documentation. (brainstorm, data visualization, additional supporting images)
